SUMMARY — Software Engineer with expertise in Angular, .NET, CQRS, microservices, and clean architectures. Proficient in PostgreSQL, SQL Server including creating stored procedures. Having extensive knowledge in Agile/Scrum as well as SDLC. Seeking to leverage my skills to build scalable, efficient solutions.

SKILLS

Languages — TypeScript, Javascript, C#, SQL, HTML **Framework/Tools** — .NET core, Angular, PostgreSQL, SQL server, GIT

WORK EXPERIENCE

Experion Technologies, Kochi — *Software Engineer* **April 2024 - PRESENT**

- Contributed to a scalable US-based hospitality platform with a cross-functional team of 90+ members across multiple scrum teams; currently part of the night support team handling critical bug fixes and enhancements through direct client collaboration.
- Created PostgreSQL functions and views to manage large data operations, including JSONB checks and duplicate handling, reducing manual work by 40%.
- Built .NET APIs, event handlers, and behaviors with clean architecture; integrated DocuSign CLM for syncing contract updates, reducing processing time by 60%.
- Built Angular components using Syncfusion, enabled API generation with OpenAPI, maintained 90%+ Jest test coverage, and followed SonarQube standards.

Experion Technologies, Kochi — *Associate Software Engineer* **March 2023 - April 2022**

- Contributed to an automotive domain application as a .NET and Angular developer, delivering 8+ key features. .
- Played a key role in developing an EV charging app admin portal for a leading automobile company, managing data for new vehicles, charging stations, charging types, payments, and users.
- Implemented and optimized backend processes for seamless user management, payment handling, and real-time updates on charging station availability, collaborating with a team of 15 members.

Experion Technologies, Kochi — *Associate Software Engineer Trainee* **November 2022 - March2023**

- Worked on an Internship Project provided by the company.
- Learned .net core, Linq, sql and Angular Framework.
- Worked on a Team of 4 members.

EDUCATION

Indira Gandhi National Open University — *BCA* **January 2024 - Present**

Algorithm, DBMS, Networking, DSA

IPT GPTC, Shoranur — ***Diploma in Computer Engineering*** **September 2020 - July 2022**

C, C++, Java, OS, DSA, Assembly, Microprocessor

CGPA — 8.95

INTERNSHIP PROJECT

Individual Development Tracker **November 2022 - March2023**

- Developed a full-stack Individual Development Planner as part of a team of 4 during the training program.
- Delivered a fully functional IDP feature within two months, meeting all project requirements and earning mentor positive feedback
- Supported manual testing in Jira to ensure feature quality and functionality.

PERSONAL PROJECT

DirectAR (Indoor Navigation Using AR) **January 2022 - March2022**

- Built a cross-platform AR navigation app using 3D indoor maps created from real-location photos for accurate navigation in large buildings.
- Used ARCore and Unity to provide real-time AR guidance with arrows, location markers, and QR-based entry detection for multi-floor support.
- Boosted navigation accuracy by 65% and cut time-to-location by around 50% in complex indoor environments.
